

Product Test Certificates

The Bolt Company are primarily an industrial fastener sourcing and supply company. We supply industrial fasteners to a number of business sectors. These sectors include

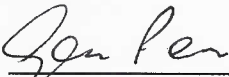

Industry Sectors					
	Quarrying		Pharmaceutical		Manufacturing
	Recycling		Automotive		Transport
	Engineering		Construction		Agriculture

TBC only source industrial fasteners from CE certified suppliers. All products are supplied to the industry DIN and ISO specification standards. Product specifications can be accessed via a linked on request.

Where a customer may require a specific batch test certification for a particular order or product, then TBC will endeavour to retrieve the relevant certification. Certs can typically only be sourced within a time window of 6 to 10 weeks after purchasing.

TBC is not a manufacturer of industrial fasteners and therefore the supply of any certification may take a time and incur an additional charge from our Supplier. Where there is an additional cost TBC will regrettably have to pass on that additional charge to the customer. Where this can be mitigated TBC will endeavour to do so.
