Din 603		Cup He	ISO 8678			
			Grade 8.8	Zinc Plated		
Available Grades and Coatings			Grade 10.9	Zinc Plated / Self Color	ur	
		Grade 12.9	Self Colour			
Fitting Tool	Alle	en Head Socket or	A2	A2 Stainless Steel		
		Allen Key	A4	A4 Stainless Steel		

Thread Calculations

The length of the 603 is measured from the head for the whole length of the countersunk set. The reason for this is because the piece is countersunk and the calculation includes the set in point which is the overall length of the fastener. The 7991 is usually a surface flush finish. This assists in machine parts fitting.

Chart Information

The green dots represent that these sizes are considered standard and normally have a stock holding on the shelf. The blue dots identify, non preferred items that can typically be ordered or have a small stock holding. The white spaced represent sizes that are non standard and therefor require specify ordering or may not be available at all. You can contact the sales team and they can advise if there is a likelihood of these sizes be sourced.
